

Unmatched technology depth and breadth

This collection of courses, references, and practice labs covers network technologies, programming environments, and design applications common in corporations today. The library is both broad and deep in its content – not only because it spans all of the dominant technologies – but also through the inclusion of legacy versions as well as the latest releases. So training and support are available for the system configuration as it exists today — and when an upgrade is imminent — materials to support the new configuration are included and ready to be accessed.

Element K – Training partner to the technology leaders

Element K is proud to be a training content provider to the world's leading IT vendors – **Microsoft, Novell, Adobe, Macromedia, and Cisco.**

- Element K was selected by Microsoft Learning to develop e-Learning for Official Microsoft Learning Products that enhance skills and knowledge using Windows 2003 Server. Separately, we were chosen as the first Microsoft Content and Service Provider, allowing us to produce and distribute Official Microsoft Learning Products to Microsoft's Authorized Training channel (Certified Technical Education Centers, IT Academies, and Microsoft Certified Partners).
- Element K has rights to produce and distribute Novell Authorized Curriculum to Novell Training Service Partners located in North America. Our relationship also provides that all our existing online courses are "authorized" by Novell and allows us to produce future online courses that are a derivative of Novell authorized courseware.

- Element K has developed and hosts <http://adobe.elementk.com> and <http://macromedia.elementk.com> — branded websites that offer application training to Adobe's and Macromedia's customers respectively. In addition, we develop and distribute all authorized courseware and online training materials to the Macromedia Authorized Training Partners (MATP).
- Element K is a Cisco Learning Solution Partner (CLSP) and therefore one of a select group of companies uniquely qualified to leverage Cisco intellectual property to create and offer Authorized Cisco training. Online training on Cisco technologies is available in the *Cisco, Cisco Advanced Technology, and, IT Comprehensive* specialty libraries.

These arrangements require that Element K courses are of the highest quality, and that ongoing course development is timely with new product releases.

Reference tools and support

Element K's integration of online reference tools and virtual labs, including a custom collection of the most relevant books on technology topics, is unmatched in the industry. Popular courses are available in a collaborative format with access to an instructor, in addition to the convenient and highly regarded self-study format. And topical "discussions" happen virtually through Element K KnowledgeShare threaded message boards, designed to give students a place to get peer feedback and assistance.

Element K delivers Learning Solutions that combine our core assets — catalog e-Learning, platform, courseware, custom content, system integration and services
